

Why Local Officials Seek Stronger Funding Commitments

Federal Apportionment, by Program

Road and Bridge Programs Funded Under TEA-21

FY 2002 Apportionments: \$31.1 billion

This chart and the accompanying three-page table show the relatively small share of funding TEA-21 directs to local decision-makers. Only about six cents of every dollar is directed to urbanized areas with a population of 200,000 or more.

Infrastructure Ownership

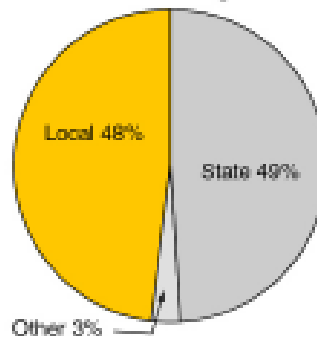

Who Owns Road and Bridge Infrastructure

Shares of all facilities

Share of Roads/Streets

Share of Bridges

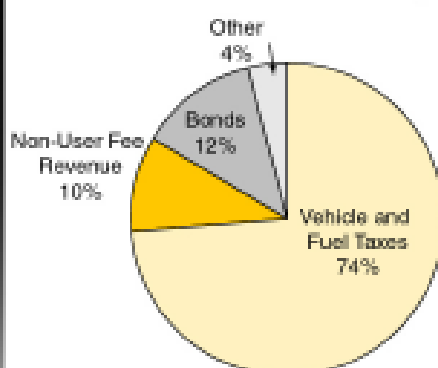

With substantial shares of the nation's roadways and bridges, local officials want more TEA-21 dollars returned back to their local areas, where local officials also own and/or operate most transit systems, sidewalks, trails and public parking facilities, along with substantial shares of the nation's train and bus stations, airports, ports and intermodal facilities.

Other Fund Sources

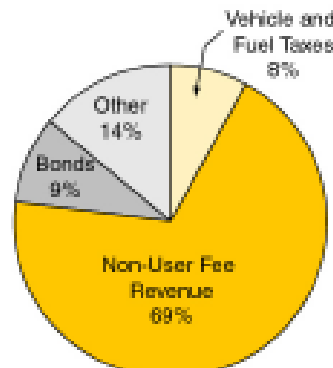

How States and Locals Fund Roadways

FY 2000, Inter-governmental transfers excluded

State

FY 2000 Total: \$66.4 Billion

Local

FY 2000 Total: \$33.9 Billion

Local governments expend substantial funds on roadway and bridge improvements, but only a small share comes from system users since most states generally limit their access to user fees. Directing more TEA-21 dollars to local decision-makers gives local areas control over the user fees derived from their local areas.
